

Position: Production Manager (Fabrication)

Basic Salary: 40-50 k per annum depending on experience & suitability

Holidays: 26 + 8 & company pension scheme

The Organisation

Turnover: 6-7 million per annum

European Heathyards who are industry leaders in high integrity fabrication, welding & tube manipulation.

Established in 1974 and based in the West Midlands (UK), European Heathyards maintains a wealth of knowledge and experience manufacturing for the following industries: Power generation, petrochemical, oil & gas, process plant, environmental & nuclear. We have 5 purpose-built manufacturing workshops that cover around 60,000 sqft, of which 10,000 sqft is a dedicated clean conditions area. Each shop is equipped with overhead cranes ranging from 5 tonne to 100 tonne lifting capacity.

We are accredited to ISO 9001, 14001 & 18001. We also hold BS EN 1090 pt. 2 (execution of steel structures) & hold an array of ASME stamps that include U,S,PP & R. We have also recently been recognised as fit for nuclear, an in-depth programme that identifies whether a company has the right procedures, personnel & skills for the UK's civil nuclear programme.

This dedication to quality control & assurance, whilst maintaining our competitive edge, enhances our presence and reputation when manufacturing heat exchangers (super heater elements, economisers, Evaporators, membrane panels, headers, manifolds), pressure vessels, pipework, burners, ducting, tanks, silos, modules & structural. These products are a few examples of what European Heathyards typically manufacture.

Skills

- Fabrication & Welding Bias
